Program of the Event

Integrated Content and Language via a Unified Digital Environment Second Multiplier Event, May 28, 2021

Overview

I.N.C.L.U.D.E. - *Integrated Content and Language via a Unified Digital Environment*, is a 3-year Erasmus+ European project (2019-2022), coordinated by CNR-IRPPS whose main purpose is to develop a communal European framework for CLIL in secondary school. The project also aims to value the concept of “Europeanity” by promoting active citizenship and preventing populism, xenophobia and violence.

Romania

The second Multiplier Event within the INCLUDE Erasmus+ Project (Integrated Content and Language via a Unified Digital Environment) 2019-1-IT02-KA201-063224 was organized in person on the 28th of May 2021, involving 66 participants: educators, students, researchers and policy makers. The venue chosen for the event was University Halls in Craiova.

Among the participants there were university professors from the University of Craiova, inspectors from the Dolj Inspectorate, guests from the Local Council and Prefecture. Also we invited representatives from Alexandru and Aristia Aman County Library as well as teachers from Craiova and nearby cities. Undergraduate students and also high school students took part in the event.

The Multiplier Event began with the welcome speech given by *Mircea Eliade* School’s Principal, Genoveva Ioana, followed by a presentation of the project and its development during the second year given by the coordinator Lidia Cazacu. An ample description of the working plan 2020-2021 (the first testing phase of the scenarios) was made by Lidia Cazacu who highlighted the next steps for the second evaluation phase, insisting on the learning strategies that support CLIL. A presentation of the Moodle platform was held by Mrs Diana Vancica and of the scenarios uploaded to the platform by *Mircea Eliade* teachers. The guests were also informed about the evaluation and Europeanity questionnaire that the students completed when the scenarios were implemented in *Mircea Eliade* School.

There were also open discussions on the scenarios and about the way they were implemented in class, pointing out the strengths of using CLIL. The conclusions and recommendations were agreed by all the participants and it is hoped that the second Multiplier Event has laid a cornerstone for the continued sharing of practical experience and lessons learnt about different approaches using CLIL.
